

Report of Game 30 and Above

05/17/2017

This report is missing most information prior to 10/11/1997. Only a few games are available prior to this date and are also included in this report. It will be adjusted to include more of the missing information if the documentation is found containing the stats prior to 10/11/1997. This report is also missing most tournament game finals because they were never published. This is because prior to taking over the job of statistician newsletters (Hoopsters) were not published after the tournament game finals were played. As far as I know the missing 'finals' information will never be available.

It is my intention to update this document approximately every 5 years if players are interested in seeing updates.

- TR = Tournament Round
- # = Number of
- > = Greater than

- ❖ Over 50 games in **Red**
- ❖ Over 40 games in **Blue**

◆ The two cartoons in this report were supplied by Owen Colfer.

Those interested in this report should look it over and try to understand it. I tried to manipulate the data in different sequences in an attempt to interest more players. All questions should be directed to me.

Dave Kaminsky
